GEAR UP!

FOR FALL ROAD TRIPS

- Plan trips ahead of time. Decide what time to leave and which roads to take. Try to avoid heavy traffic, poor weather and high-speed areas.

- Wear your seat belt correctly. (It should go over your shoulder and across your lap.)

- Drive at the speed limit. It's unsafe to drive too fast or too slow.

- Be alert! Pay attention to traffic at all times.

- Keep enough distance between you and the car ahead of you.

- Be extra careful at intersections. Use turn signals and remember to look around for people and other cars.
