GEAR UP!

FOR WARM FIRES

- Follow the directions on the package if using man-made logs. Never break apart to quicken the fire.

- Never close the damper with hot ashes in the fireplace.

- Always use a sturdy screen when fireplaces are in use.

- Burn only wood. Paper or pine boughs can float out the chimney and ignite your roof or neighboring homes. Also, plastic, charcoal and Styrofoam can produce toxic gases!

- Make sure the fire is out before leaving the house or going to bed.
