

Take 5

for Home Safety

- Spring cleaning is a chance to mitigate hazards both inside and outside your home.
- Ensure all poisons and hazardous materials are clearly marked and secured from children and pets.
- Keep emergency numbers and contacts readily available.
- Place fire extinguishers in key locations and know how to use them.
- Recognizing hazards and knowing how injuries occur are key to protecting everyone in your home.
- Slips, trips and falls can happen anywhere — keep walkways dry and free of clutter.

Take 5 ... then take action.
