

# TH-67 Creek

# CRASH RESCUE

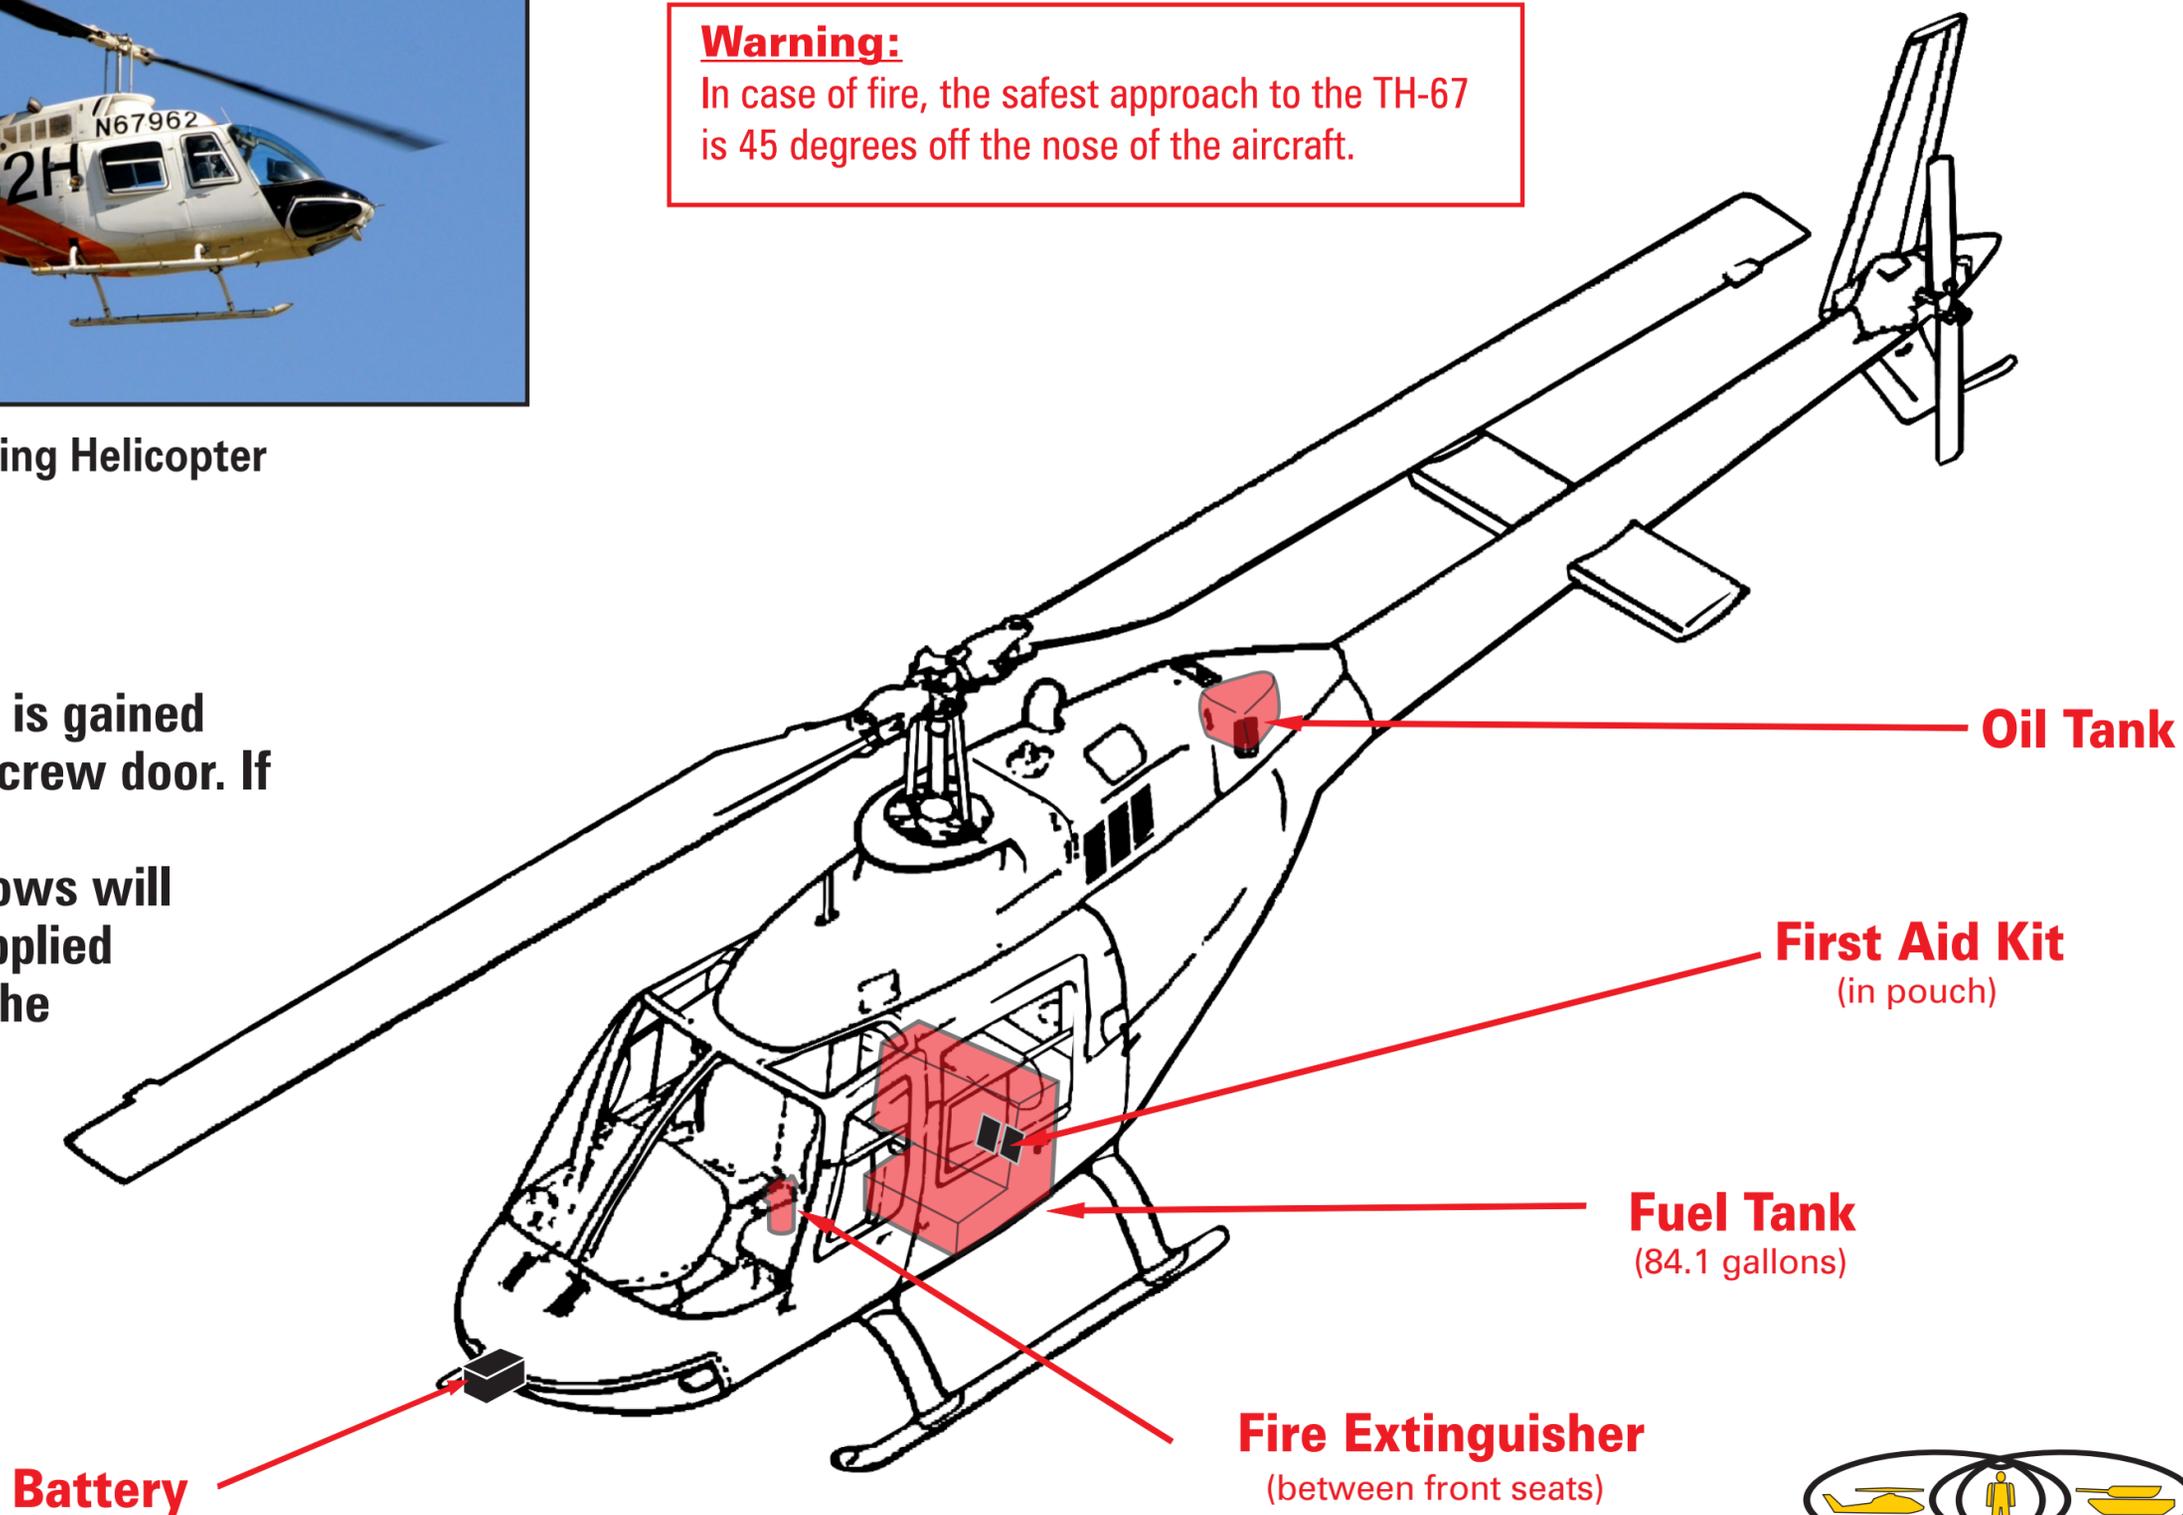

TYPE: Single Engine Training Helicopter  
CREW: 2  
PASSENGER: 1

● Emergency entrance is gained through either cabin or crew door. If the door(s) will not open, the windows will pop out if pressure is applied to their outer edges of the window. If the window will not pop out, break the Plexiglas to enter

**Warning:**

In case of fire, the safest approach to the TH-67 is 45 degrees off the nose of the aircraft.
