

GEAR UP!

SANTA IS WATCHIN' YOU

- When setting up the tree, place it away from radiators, stoves or other sources of heat such as lighted candles.
- Watch for faulty wiring or light sets that could cause a potentially deadly electrical shock or severe burns to individuals coming into contact with them.
- Some decorative houseplants are poisonous. Keep plants such as holly and mistletoe out of the reach of small children and pets. Ingestion of these plants can be dangerous – possibly even fatal.
